

Application for MSc

For office use

Date Received:

Application No:

Master of Science in Molecular Life Sciences/ Master of Molecular Life Sciences

Personal Details

1. Surname (Mr/Ms/Mrs/Dr.)

2. Other names

3. N.I.C No.

4. Date of birth / / 5. Age 6. Civil Status

7. Permanent address

8. Telephone 9. E-mail

Academic Details

Diploma/Degree	Subjects	University	Class/Pass	Duration

Employment Details (If any)

10. Present employment

11. Address of Employee

Application for MSc

Referees

Referee 1	Referee 2

Personal Statement

A personal statement of not more than 500 words should be submitted with the application.

Guidelines for Personal Statement

The main objective in obtaining a personal statement/statement of purpose from prospective students is to get to know them and their interests.

A personal statement should contain the following:

- A short description of the students academic and personal background, including any extracurricular activities and interests
 - The students academic and personal achievements and any difficulties he/she has had to overcome reasons for pursuing a Masters degree in Molecular Life Sciences
 - A short description conveying what the student knows about the subjects and what he/she has researched and understood about the course as well as the institute/university
 - The students objectives and goals in life and what he/she intends to do after the course – this should include the students vision of how he/she intends to implement the knowledge gathered during the course for the benefit of science and the community
- A short description of the students specific area(s) of interest within Molecular Life Sciences and research area that he/she would like to pursue
- Any additional information that is relevant and that will distinguish the student from other applicants

A well-written personal statement should enable the admission committee to:

- Evaluate the student and his/her skills beyond what is evident in the transcripts
- Gain a clear understanding of the students motivations and aspirations
- Assess the students likelihood of success as a graduate and a professional
- Assess the students likelihood of becoming a responsible professional in the field of science
- Determine whether the student has researched the course and the institute thoroughly and is aware of the academic demands of the course and the facilities available
- Determine whether the student will be an asset to the institute and the scientific as well as the global community
